概要

顧客: LAN NET Solutions, LLC Industry: Telecommunications Location: Texas Company Background: テキサス州を本拠地とする LAN NET Solutions は、フルーク・ネットワークスの LinkWare Live リワード・プログラムの受賞者です。テキサスでは何もかもが大きいと言われるように、LAN NET Solutions が受賞した OptiFiber Pro も大きな賞でした。LAN NET Solutions, LLC provides structured cabling installation solutions to support existing and emerging technologies for voice and data applications. The company, which was founded in 2013, is proud to offer its business and residential customers in Texas and the southwest high quality, honest answers to all of their cabling needs.

課題

Jim Bringolf, President of LAN NET Solutions, finds that using LinkWare Live helps the company save time in several ways. One of capabilities the company appreciates is being able to create tests in advance, making the certification process much quicker once they are on-site. Uploading test results from job sites is also faster and easier with LinkWare Live.

解決策

LinkWare Live cuts costs and prevents errors by letting project managers check on testing progress, without being physically present. "That was one things we were really excited about when we were working on a big project recently," said Scott Hooks VP and Owner. "We had a total of 8000 tests for this particular job, and we were able to set up and name all of the tests ahead of time. Then, while testing was underway, we could check to see what percentage was done while we were sitting in the office."

結果

LinkWare Live was introduced by Fluke Networks late in 2014. It's a cloud-based service that works with Fluke Networks Versiv testers, including DSX-5000, OptiFiber Pro and CertiFiber Pro certification testers. The LinkWare Live platform allows users to upload, manage and analyze complex certification test results from anywhere. フルーク・ネットワークスのお客様によって、これまでに 100 万件以上のテスト結果が LinkWare Live プラットフォームにアップロードされています。
